

# 6 DC V2V

|                      |                                                                                                                                    |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Output power range   | 0~40kW                                                                                                                             |
| Output voltage range | 50~750V                                                                                                                            |
| Incoming current     | ≤63A                                                                                                                               |
| Frequency            | 50Hz                                                                                                                               |
| Charge mode          | Auto fill                                                                                                                          |
| Communication mode   | Private CAN protocol on the output end, GB on the input end                                                                        |
| Starting mode        | Button                                                                                                                             |
| Standby power loss   | ≤0.15% Output rated power                                                                                                          |
| Size (L*W*H)         | Control enclosure: 335*180*96 (mm)                                                                                                 |
| Housing material     | ABS+PC                                                                                                                             |
| Net weight           | ≤8KG (With a head)                                                                                                                 |
| Output line length   | 2M at both ends (excluding charging head and control box)                                                                          |
| Status display       | LED indicating lamp                                                                                                                |
| Working temperature  | -30°C-50°C (derating over 50°)                                                                                                     |
| Humidness            | Max. 95% (relative humidity)                                                                                                       |
| Altitude             | ≤2000m                                                                                                                             |
| IP rate              | IP67                                                                                                                               |
| Cooling mode         | Natural cooling                                                                                                                    |
| Protection mechanism | Against Low voltage, over voltage, lightning protection, grounding fault, over current, leakage protection, over temperature       |
| Standard             | GB / T 18487.1 - 2015, GB / T 20234.1 - 2015, GB / T 20234.3 - 2015, GB / T 27930 - 2015, GB / T 34657.1 - 2017, GB/T 34658 - 2017 |
